

From our humble beginnings, and with crucial support from our peers, CSAS has built and demonstrated its capacity to contribute to American snow system science. As we grow, we have broadened our sources of support for operations, research, and our long-term monitoring program. We are continuing to build relationships with other snow and mountain research organizations worldwide.

National Science Foundation Grant #ATM-0431955 -Collaborative Research:

Radiative Effects of Desert Dust Deposits in Alpine Snow

September 1, 2004 - August 31, 2005: \$99,065.00

September 1, 2005 - August 31, 2006: \$20,946.00

September 1, 2006 - August 31, 2007: \$53,641.00
